

TIME

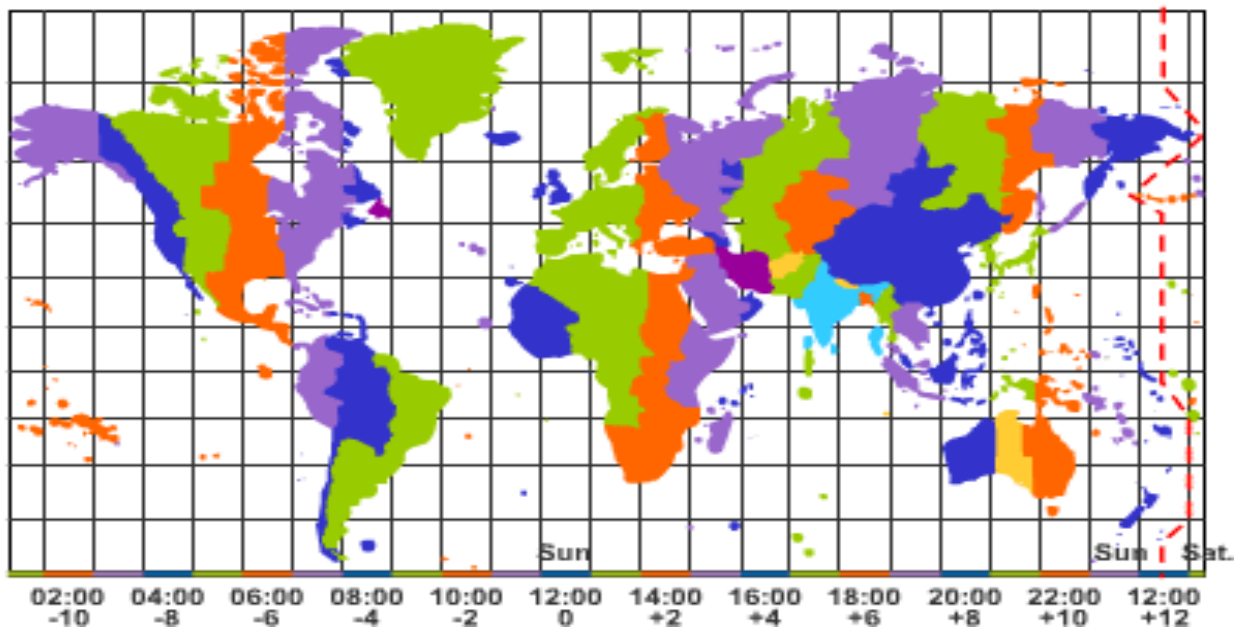

SKILLS QUESTIONS

EARTH TIMES

As the world turns every 24 hours, the time zones around the world differ. Time is standardised in Greenwich, just outside London in England. GMT is Greenwich Mean Time.

On the bottom axis of this world map, the numbers indicate the time difference of that location compared with London time. For example, Sydney Australia (GMT +10) is 10 hours ahead of London time; New York (GMT -5) is 5 hours behind London time.

World Time Zones

It is 7am Sunday in Rome Italy (GMT +1). Complete the table to find the local time at the location indicated. The first one has been done as an example.

	LOCATION	GMT	LOCAL TIME
Example	Sydney Australia	GMT +10	7am Sunday – 1 h + 10 h = 4pm Sunday
Q1	Istanbul Turkey	GMT +2	
Q2	Delhi India	GMT +5:30	
Q3	Beijing China	GMT +8	
Q4	New York USA	GMT -5	
Q5	LosAngeles USA	GMT -8	

ANSWERS

Q1. 8am Sunday

Q2. 11.30am Sunday

Q3. 2pm Sunday

Q4. 1am Sunday

Q5. 10pm Saturday
